

A desert landscape at dusk, featuring a campfire and lounge chairs. The scene is set in a rocky, arid environment with a large, layered rock formation in the background. The sky is a mix of dark blue and orange, suggesting the time is either sunset or sunrise. In the foreground, a square fire pit with a bright fire inside is surrounded by four folding lounge chairs with light-colored cushions. Several small, glowing lanterns are placed around the campsite, casting a warm light. The overall atmosphere is serene and inviting.

THE PERFECT PARTNER FOR YOUR PROJECT

For 30 years, DEDON has been creating outdoor furniture of unsurpassed quality and design. Along the way, the company has developed a deep understanding of the needs of its contract partners: Experience. Versatility. Timeliness. A global reach. Dedicated service. The widest possible choice of product types, styles, colors and finishes. Above all, a level of quality that cannot be matched.

These are the things that matter to customers, and DEDON is uniquely positioned to deliver them, whether with its hand-woven collections, manufactured entirely in house, or with its teak and upholstered collections, produced by suppliers that share DEDON's passion for excellence.

Developed in the company's own R&D labs, DEDON contract products come in an array of styles suitable to any decor or outdoor concept. A wide range of customization options are also available. And once DEDON products have been installed, contract partners can rest easy because they know the products will last. Thoroughly tested for strength, durability, weather resistance, UV-resistance, colorfastness and more, every piece meets the highest quality standard of all — DEDON's own. Guaranteed.

DEDON STORY

A REVOLUTION IN OUTDOOR LIVING

It began thirty years ago with the creation of a groundbreaking fiber. Explorers by nature, DEDON went searching for artisans skillful enough to weave this fiber into the world's most luxurious outdoor designs. The journey led to the Philippine Island of Cebu, where DEDON launched its first furniture manufacturing facility twenty years ago. What followed was a revolution in outdoor furniture. Owning and operating its own furniture production, including fiber extrusion at its headquarters in Northern Germany, has enabled DEDON to experiment, explore and create without constraint. Setting the standard for quality, comfort and iconic design, DEDON has changed the way we live outdoors.

CREATING ICONS FOR THE OUTDOORS

Working closely with some of the world's leading designers, DEDON has been raising the bar for design and innovation in outdoor furniture since the beginning. LOUNGE, the first truly modular outdoor lounge system, was a game-changer. Signature pieces such as ORBIT, NESTREST and the MBACE rocker have introduced new ways to enjoy life under the open skies. Each of these pieces, and many others, are characterized by such creativity, innovation and uncompromising attention to detail that they have achieved the status of icons for the outdoors.

NESTREST

Nay Palad Hideaway, Siargao, Philippines

MANUFACTURING

THE ART OF WEAVING —
EACH AND EVERY PIECE OF WOVEN
DEDON FURNITURE IS UNIQUE

DEDON's master weavers, among the most talented in the world, are just one more way the company sets itself apart. It was the legendary skill of these weavers that first attracted DEDON to the Philippine island of Cebu Island. Their creativity is reflected in weaving patterns of incomparable intricacy, innovation and artfulness. Indeed, each and every piece of handwoven DEDON furniture is a unique creation, the embodiment of modern technology and centuries-old craftsmanship.

ANCIENT HANDCRAFT MEETS MODERN TECHNOLOGY

Unique within the outdoor industry, DEDON owns and operates the entire value chain of its handwoven outdoor furniture. While other brands outsource to distant suppliers, DEDON lovingly oversees every aspect of its woven products' creation, from design to delivery. This ensures levels of quality and value that can't be matched.

FIBER PRODUCTION
Lüneburg, Germany

It begins with DEDON Fiber. Researched, developed and manufactured at DEDON's state-of-the-art production facilities in Northern Germany, DEDON Fiber is unrivaled for resilience, color-fastness and strength. Each new profile of DEDON Fiber is tested in the lab for resistance to UV rays, saltwater, chlorine, sunscreen and extremes of temperatures. When it has proven its quality, the fiber is sent to Cebu island in the Philippines, home to DEDON's master weavers.

THE DEDON FIBER ADVANTAGES

- *Made with high density Polyethylene (HDPE)*
- *Eco-friendly, free of toxins and 100% recyclable*
- *Best possible weather and light stability*
- *High UV resistance*
(no color change after 10 year's exposure)
- *High stability (tensile strength > 230 kg/cm²)*
- *Resistant to pool and seawater, heat and cold*
- *Low maintenance and easy to clean*
- *5 years warranty*

DEDON PRODUCTION

DEDON FIBER: A ‘LIVING’ MATERIAL

Interview with Nils Kettering, Fiber Division Director

July 2020

Unique within the outdoor industry, DEDON owns and operates both its furniture and its fiber production. This allows us to bring our fiber specialists and world-class designers together to develop innovative new fiber colors, profiles, textures and effects. More than just a material, DEDON Fiber becomes the expression of a collection’s soul. Overseeing this process is the ultimate fiber expert, Nils Kettering. DEDON’s Fiber Division Director, Nils has been with the company for more than 15 years.

After such a long time, what still fascinates you about working on DEDON Fiber?

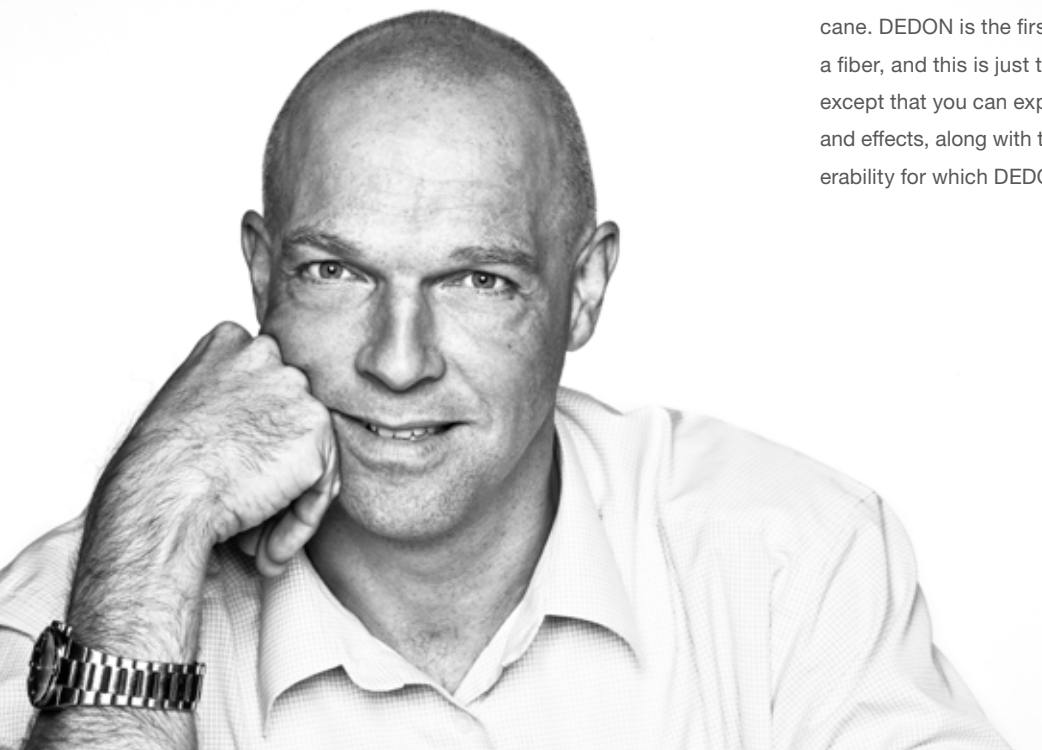

Actually, my job only gets more fascinating. I collaborate with leading international designers on every new fiber. I work on bold innovations such as our new EcoCycle Fiber. I oversee a state-of-the-art production facility that produces zero waste. But what fascinates me most is the sheer variety of design options — shapes, structures, colors, haptics — my team and I develop. Fibers with metallic shimmers; fibers with a velvety-soft touch, like those of our RILLY collection; fibers that imitate natural materials in their beautiful imperfection — the list goes on. The development and testing process for each new fiber takes 12 to 18 months, but it’s always worth it to see our ideas become reality and end up in the most beautiful gardens in the world!

What is your development credo for DEDON Fiber?

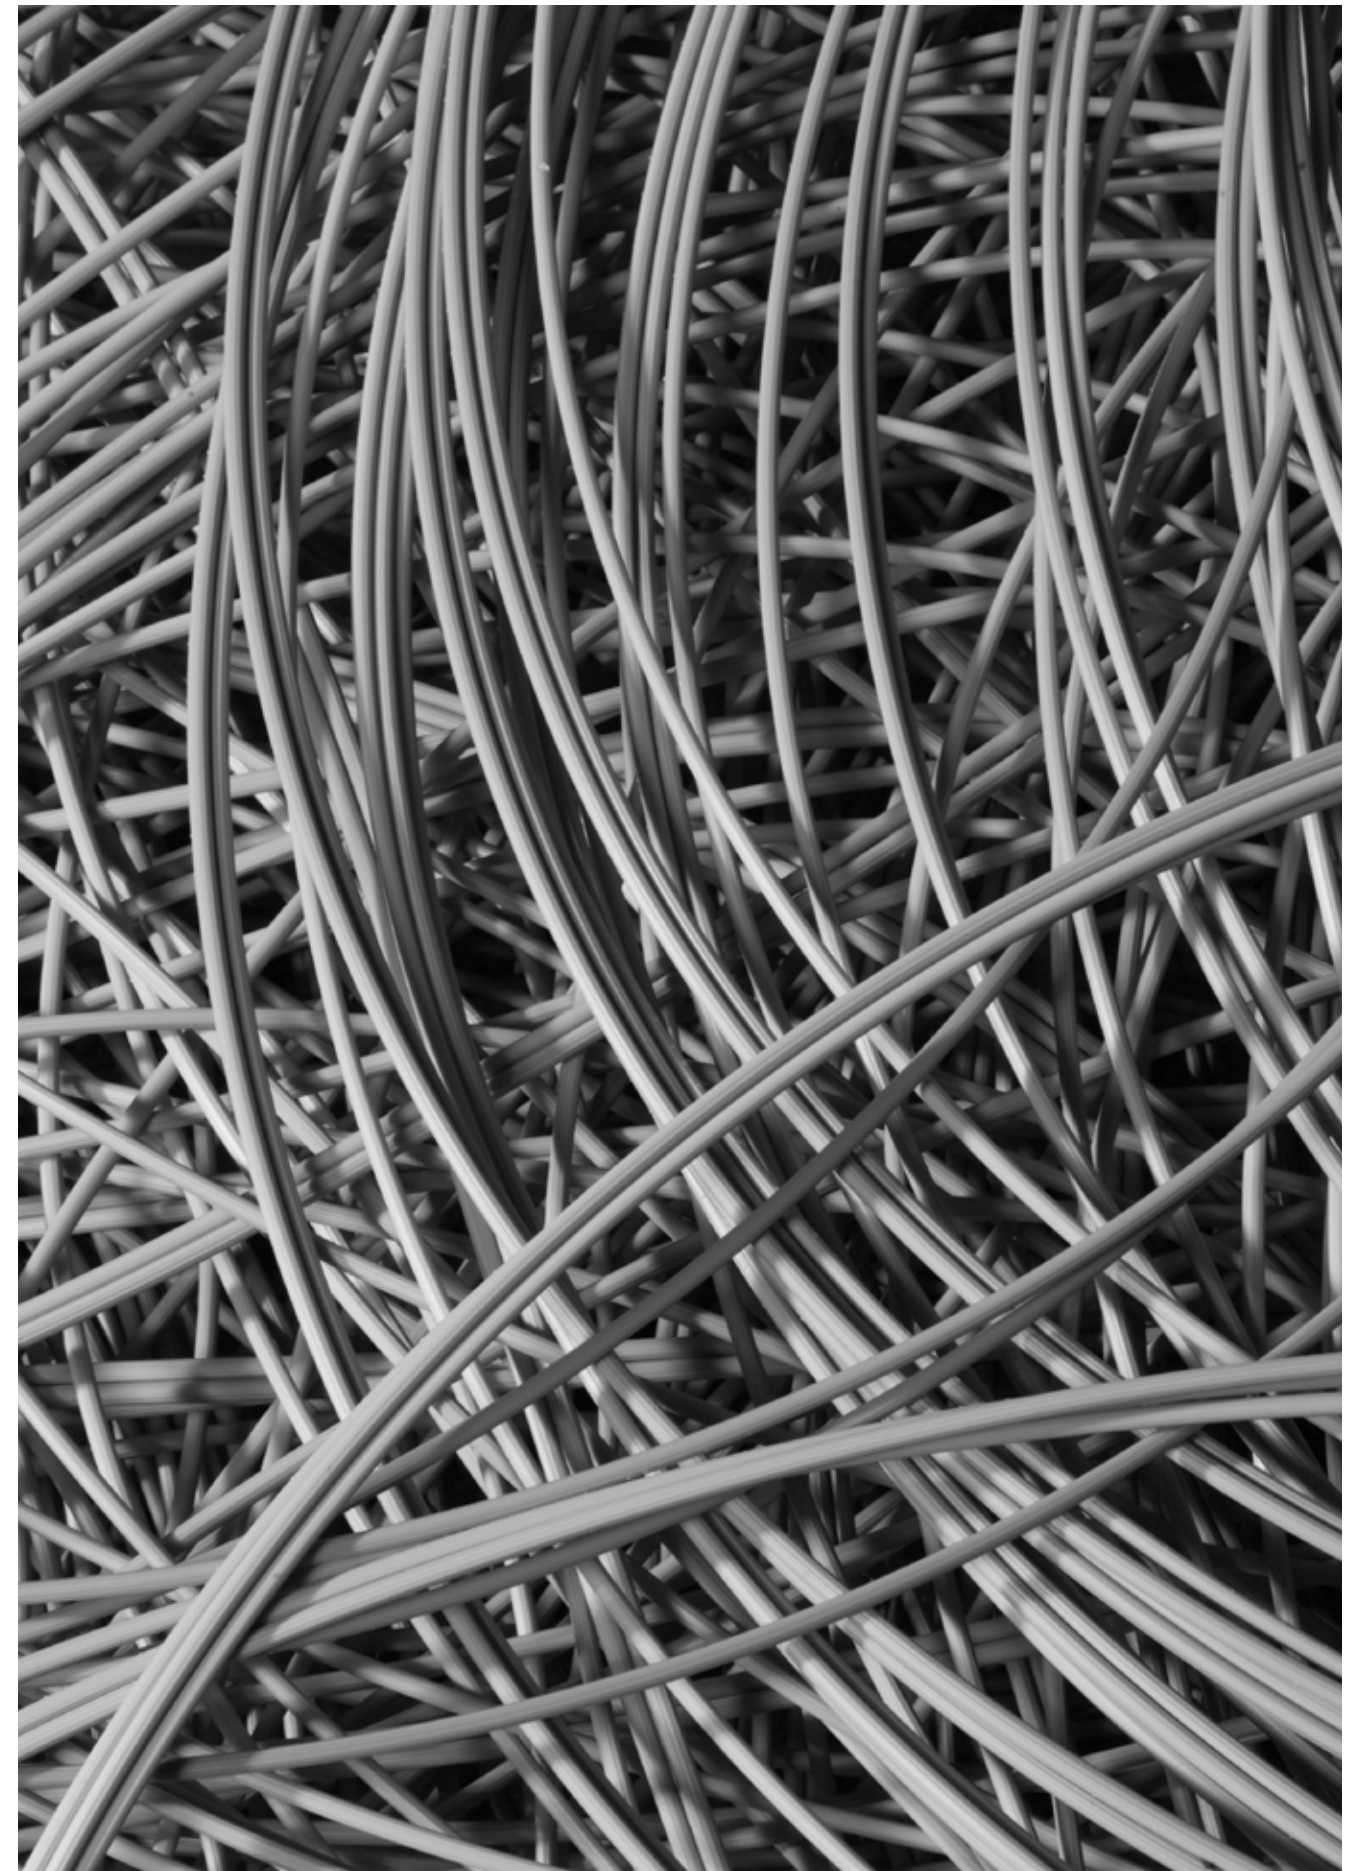

For me, DEDON Fiber is a ‘living’ material. Even if the raw material is synthetic, the final result should always look and feel vibrant. We achieve this, in part, by carefully controlling 95% of each production run while allowing 5% to be random. This means every strand of fiber is truly unique, with subtle optical and haptical differences both within the fiber and between fibers from different runs. It takes a lot of work and know-how to achieve this, but we have always insisted on it. Along with our unrivaled quality standards, it’s what differentiates DEDON Fiber from the rest.

Looking into the future, how is DEDON Fiber developing?

In 2021, we launch our new EcoCycle Fiber, which is made with renewable raw material derived from sugar-cane. DEDON is the first in the industry to create such a fiber, and this is just the beginning. I won’t say more, except that you can expect new looks, textures, haptics and effects, along with the unrivaled strength and weatherability for which DEDON has always been known.

NILS KETTERING
DEDON's Fiber Division Director

HANDMADE CERAMICS
Laboratorio Pesaro, Italy

MATERIALS

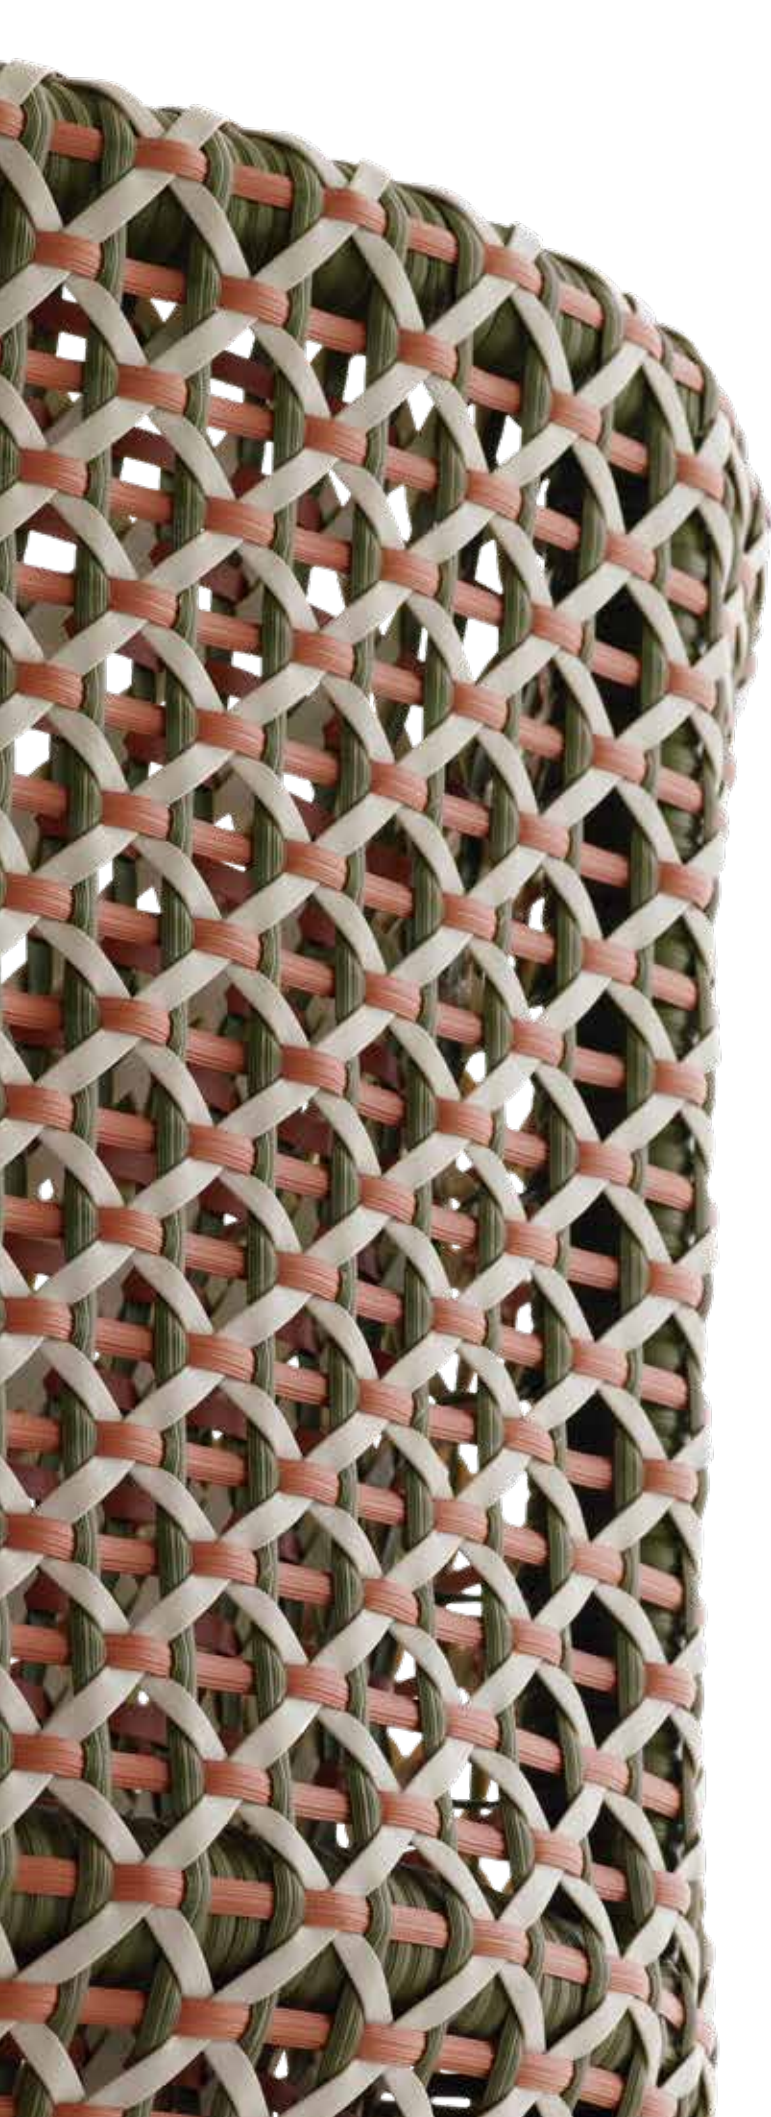

THE HIGHEST STANDARDS OF QUALITY

DEDON works exclusively with suppliers who share its passion for quality, sourcing only the highest-quality materials from its worldwide network. For items not produced in-house, DEDON collaborates with makers and manufacturers at the top of their craft, capable of transforming these materials into outstanding products.

For its teak and upholstery collections, as well as for ceramics and aluminum castings, DEDON partners with companies specialized in those materials for decades. For fabrics and sling materials, DEDON works with carefully chosen ateliers in Italy, Belgium and the United States.

To complete its range of surfaces and offer the widest range of styling possibilities, DEDON uses HPL, glass and powder coatings in a versatile range of colors and finishes. But whatever the material, whether raw or refined, DEDON ensures the same standards of quality it applies to its own fiber—the highest.

MBARQ
Chestnut fiber

FIBER

Researched, developed, manufactured and quality-tested at our state-of-the-art production facilities in Northern Germany, DEDON Fiber (HDPE) is unrivaled for its durability, weather-fastness and luxuriousness of color, texture and touch. Strong enough to withstand the harshest conditions yet supple enough to be woven into artful patterns by our master weavers, it has revolutionized outdoor furniture. The final product is non-toxic, non-polluting and fully recyclable. It is maintenance-free, easy to clean and recommended for indoor and outdoor use.

RILLY
Taupe melange rope

ROPE

The traditional Italian maritime rope that DEDON uses for RILLY and SEALINE is a fresh interpretation of the brand's unique weaving heritage. Master colorist Giulio Ridolfo developed sophisticated yarn combinations for the rope, which is characterized by an appealing, textile touch. Made of polypropylene yarns, with tenacity fillers for extra strength, the rope is weatherproof, non-absorbent and ideally suited for outdoor use. It offers excellent light fastness (grade 6), color fastness (against both chlorine and saltwater) and resistance to physical stress, UV radiation, mold and more.

TEAK

Teak is one of the world's most precious timber resources. Sourced exclusively from certified plantations, DEDON's natural-finish premium teak represents the highest standard of quality. Rich with natural tannin oils, the wood is exceptionally long-lasting and durable. Without any additional surface protection, it is resistant to rain, strong sunlight, freezing conditions and fluctuating temperatures. If allowed to age naturally outdoors, it will eventually acquire a beautiful, soft, silver-gray patina. To retain its original golden hue, DEDON teak oil can be applied at least twice per year.

SEALINE
Teak side table

BREA
Removable upholstery

UPHOLSTERY

DEDON relies on some of the world’s most advanced textile technologies to create cushions and upholstery of unrivaled comfort and performance. DEDON fabrics come in a wide range of colors and have a soft, natural touch. Suitable for both indoor and outdoor use, they are quick-drying, easy to maintain and specially coated to make them splash- and UV-resistant. Encased in molded polyurethane foam, with belting for extra comfort, the core of each DEDON upholstery piece is protected by a water-repellent and breathable polyester covering. The foam core and synthetic fiber padding of DEDON cushions is surrounded by a spun-bonded wrap, also water-repellant and breathable, that ensures maximum comfort and outdoor-readiness.

NEWPORT
Sling seat

CERAMICS

DEDON sources only the highest-quality ceramics, produced by two different manufacturing processes. Ceramic products made using mold-casting techniques reflect DEDON’s passion for traditional craftsmanship. Ceramic tabletops derived from specially-cut mineral-composite slabs reflect DEDON’s drive for the most innovative, high-performance materials. Twice as strong as glass, the tabletops are resistant to UV-rays and scuffing. All DEDON ceramic products are frost-proof, pore-free, non-absorbent and resilient against scratching, abrasion and indirect tensile stress.

MBRACE
Ceramic tabletops

SLING

DEDON works with a top-quality sling material that is lightweight and flexible yet highly robust. Able to elongate under load while retaining its original shape, the material has excellent tensile strength and a long life expectancy. Mold-resistant, flame-retardant, acoustically absorbent, exceptionally light-stable and able to withstand extremes of temperature, the material is also 100-percent recyclable.

DESIGNERS

GAMFRATESI

Copenhagen, Denmark

AIIR, RILLY

Cross-cultural duo Stine Gam and Enrico Fratesi expand on their native Danish and Italian design traditions, taking an experimental approach to materials and technique.

EDWARD BARBER & JAY OSGERBY

London, UK

BREA, TIBBO

Edward Barber and Jay Osgerby’s diverse and acclaimed body of work spans industrial design, furniture, lighting, site-specific installations and public commissions.

LORENZA BOZZOLI

Milan, Italy

BRIXX, LA MALLE, PORCINI

A fashion designer by training, Lorenza Bozzoli brings a fresh approach to furniture design. Her work has been showcased in leading international venues.

JEAN-MARIE MASSAUD

Paris, France

DEAN, SATELLITE, SEASHELL, SEAX, SEALINE

From furniture to store interiors to a world-famous football stadium, Jean-Marie Massaud is renowned for his signature mix of elegance and comfort, heritage and zeitgeist.

SEBASTIAN HERKNER

Offenbach, Germany

LOON, MBRACE, MBARQ

Sebastian Herkner’s work merges cultural contexts by juxtaposing materials, combining new technologies with traditional craftsmanship, and drawing attention to small details.

STEPHEN BURKS

New York, USA

KIDA, AHNDA, DALA, THE OTHERS

Stephen Burks frequently explores the role of handwork in his innovative and award-winning designs. He has collaborated with artisans and crafts-people around the globe.

ARIK LEVY

Paris, France

IZON

An artist working across media and disciplines, from public sculpture to video art to industrial design, Israeli-born Arik Levy has exhibited in prestigious museums and galleries worldwide.

Berlin, Germany

CIRQL

Werner Aisslinger has developed an international reputation for cutting-edge design concepts, iconic furniture, head-turning hotel interiors and innovative brand architecture.

PHILIPPE STARCK

Paris, France

PLAY WITH DEDON (with Eugeni Quitllet)

From lemon squeezers to mega-yachts, no object is too small or too big to attract the unique eye and boundless curiosity of world-renowned designer Philippe Starck.

DANIEL POUZET

Draguignan, France

NESTREST (with Fred Frety), SWINGREST

Daniel Pouzet studied in Paris and his native Bucharest. His work combines architectural rigor with a sense of fantasy and play, frequently drawing inspiration from the natural world.

RICHARD FRINIER

Long Beach, USA

BARCELONA, ORBIT & ORBIT XXL, PANAMA, TANGO

American-born Richard Frinier has been described as “the king of outdoor furniture.” He is known for his mastery of a wide range of styles, from classic to contemporary.

HARRY-PAUL

Barcelona, Spain

BABYLON

Harry-Paul is known for the air of mystery that surrounds his objects. His bold, forward-looking approach involves experimentation with materials and topologies.

FRANK LIGTHART

Antwerp, Belgium

LEAF, LOUNGE

Dutch designer Frank Ligthart has always loved the combination of aesthetics and technics. His work is an expression of his passion for turning concepts into tangible realities.

EUGENI QUITLLET

Barcelona, Spain

PLAY WITH DEDON (with Philippe Starck)

Eugeni Quitllet’s work is characterized by meticulous attention to detail, uncompromising standards of quality and the passion he puts into each and every creation.

TOAN NGUYEN

Milan, Italy

LOU, MU, WA

Toan Nguyen takes a multidisciplinary approach to design, focusing on development in a wide range of fields, from furniture to technology products.

HENRIK PEDERSEN

Aarhus, Denmark

NEWPORT

Henrik Pedersen creates furniture and lighting based on the principle that good design should be functional, beautiful and easy to understand.

GLOBAL EXPERTISE

HIGHEST-QUALITY PRODUCTS ARE MATCHED
BY HIGHEST-QUALITY SERVICES.

DEDON sets the standard of quality with its products, and the same is true of the service it provides its contract partners. With representatives on six continents, DEDON is there to help with advice and planning, budgeting, customization services, transport, on-site installation, or all of the above. In addition, the DEDON Professionals Portal offers the latest digital visualization tools. A great 2D/3D planner lets architects, interior designers, decorators and other trade professionals simulate any terrace, garden or outdoor area. CAD files allow users to visualize DEDON products from all angles and incorporate them into their planning. And DEDON's Autodesk Revit files make it easier for architects and planners to incorporate DEDON products into their large-scale projects.

SUSTAINABILITY STARTS WITH LONG-LASTING QUALITY.

Enjoying life outdoors comes with a responsibility to preserve and protect life outdoors. That's why DEDON is committed to sustainability in every aspect of its business, from fiber production to furniture manufacture to materials sourced from its partners. In keeping with its commitment, DEDON seeks to create outdoor furniture of such enduring quality, resilience and style that it need never be discarded. But the commitment doesn't end there. All DEDON handwoven furniture is produced in a socially responsible environment at DEDON's own zero-waste facilities in Northern Germany. All DEDON Fiber, produced in Northern Germany to the highest environmental standards, is 100% recyclable and nontoxic, polluting neither groundwater nor the ozone.

CUSTOMIZATION

CUSTOMIZATION OPTIONS FOR PROFESSIONALS

DEDON manufactures its weather-proof fiber and award-winning furniture at its own production facilities in Northern Germany and the Philippines. This ensures the highest levels of craftsmanship, quality and innovation while enabling DEDON to develop customized solutions for architects and contract professionals:

- *Create individual settings for your projects with customized designs.*
- *Choose the perfect color for DEDON Fiber, powder-coating and other materials.*
- *Select from a variety of high-end outdoor fabrics or propose your own fabric.*
- *Take advantage of custom cushion manufacturing and, exclusively for contract use, DEDON's special slim cushions, available on demand.*

Contact **customer-service@dedon.de** to discover DEDON's full range of customization options.

DEDON ECOCYCLE FIBER

MADE WITH THE HELP OF NATURE

Derived 90% from renewable plant-based resources, DEDON EcoCycle Fiber is an eco-logically-conscious alternative to conventional, fossil-fuel-based products. It offers the same luxurious look and feel as standard DEDON Fiber, along with the same unrivaled strength and weatherability.

With EcoCycle Fiber, DEDON proves the viability of an innovative sourcing procedure for renewable raw material. DEDON EcoCycle Fiber is made with polyethylene derived from sugarcane ethanol. Extruded at DEDON's own state-of-the-art production facilities in Northern Germany, EcoCycle Fiber meets the same exceptional standards of quality — and is protected by the same warranty — as DEDON Fiber. And like them, it is fully recyclable through existing systems at the end of its product lifecycle.

Available from 2021 for the SEALINE collection by Jean-Marie Massaud, EcoCycle Fiber will eventually be introduced for all DEDON woven collections.

RENEWABLE RESOURCES
Sugarcane

KEYFACTS: DEDON EcoCycle Fiber

- Is produced with polyethylene from renewable agricultural resources (sugarcane-derived ethanol).
- Uses a raw material that has a negative CO² footprint.
- Can be fully recycled through existing recycling systems at the end of its product life-cycle.

TABLETOPS

THE FINISHING TOUCHES FOR YOUR TABLE

From glass to teak, aluminum to HPL, DEDON offers a wide range of tabletop materials. These innovative solutions not only integrate with the design concepts of the various collections but also meet the top-quality standards DEDON insists upon for all of its outdoor furniture.

Single-layer tempered glass

Offers increased resistance to temperature changes as well as excellent resistance to bending, impact and shock. To clean a glass tabletop, use a soft cloth, warm water and a gentle cleanser if needed.

High pressure laminate (HPL)

A non-toxic material that is highly resistant to impact, mechanical stress, moisture and steam. To clean an HPL tabletop, use a soft cloth, warm water and a gentle cleanser if needed.

Powder coated metal

The metal sheets are covered with a highly resistant powder coating, giving the tabletop unbeatable durability and outdoor performance. Clean with a soft cloth and warm water.

Natural-finish teak

Consisting of beautiful premium teak sourced from sustainable plantations, the tabletop is rich with natural tannin oils, offering great durability in extreme weather conditions. Wash with natural soap dissolved in warm water.

Mineral composite

These innovative, long-lasting mineral-composite tabletops are waterproof, extremely hygienic and highly resistant to frost, UV-rays and abrasion. Clean with soft cloth and warm water.

Ceramic

The tabletop is made of Monolite Ipergres®, a frost-proof ceramic that is non-absorbing and highly resistant to impacts, scratches and abrasion. Clean with a soft cloth and warm water.

Watch out: Dark tabletops may become very hot when exposed to strong sunlight.

Armchairs and dining tables

TEAK

THE BEAUTY OF TEAK

Teak is one of the world's most valuable timber resources. Furniture made from beautiful premium teak, sourced from sustainable plantations, is rich in natural tannins and is able to withstand even extreme weather conditions over an exceptionally long life-time. The wood is resistant to rain, strong sunlight, freezing conditions and fluctuating temperatures. These qualities make it particularly well-suited to long-term outdoor use.

Made exclusively from premium teak, DEDON teak furniture requires no special maintenance besides other than periodic cleaning. If allowed to age naturally outdoors, it will eventually turn to a soft, silver-gray as surface pigments fade. As this is a natural process, the silver-gray color may appear irregularly, especially at first.

NATURAL-FINISH TEAK

WEATHERED TEAK

To retain the wood's original, golden hue, use DEDON teak oil at least twice a year. To clean it, use a DEDON cleaning agent once or twice a year. To remove any rough grain and restore the wood to its smooth finish, lightly sand the surface from time to time. Allow your teak furniture with cushions to dry before using covers. To prevent mold and stains, DEDON recommends not to use covers for tables with teak tabletops.

Cushions that are in contact with new teak can occasionally show signs of teak staining. This is caused when the natural pigments and oils within the new teak bleed out over time, leaving a red-brown stain on the cushion fabric. To remove the teak stains, wash the cushion covers at a lukewarm temperature (30°C) with a mild soap.

Teak bleeding may leave stains on the ground around the furniture as well. Any damage caused by teak bleeding is not covered by DEDON warranty.

COVER

DEDON COVERS — HANDLING AND CARE

DEDON furniture covers are made of Weathermax®, a heavy-duty, 100%-solution-dyed polyester fabric. Weathermax® is water-resistant and UV-resistant, with outstanding breathability and durability. Because of their superior breathability, DEDON covers minimize dampness, heat build-up and condensation, helping to prevent mold and mildew from forming on your furniture.

Tailored to fit perfectly over their corresponding products, DEDON covers feature zippers for easy draping as well as elastic straps and loops (product-specific) for securing them in windy conditions. Clean covers with warm water and a gentle upholstery

cleaner. Take care to prevent puddles of water from forming on the cover's surface. Before storing, allow them to dry by hanging them using the featured strap (not part of all covers). Do not bleach or iron.

All cushions should be dry before applying DEDON covers. For longer periods, e.g. during wintertime, we recommend storing your cushions in a dry place indoors.

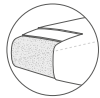

CUSHIONS & FABRICS

CUSHIONS YOU CAN LEAVE OUTDOORS

DEDON relies on some of the world's most advanced textile technologies to create cushions you can leave outside. Our high-quality acrylic materials are UV-resistant and specially treated to be splash-resistant, all with no loss of comfort. The foam cores, created exclusively for DEDON, and synthetic fiber padding are surrounded by a water-repellent, breathable, spun-bonded wrap. After a rain shower, allow your cushions to dry so as to protect them from mold stains. We recommend storing your cushions for the winter or when not in use for long periods, and using covers to keep them at their best. Before storing, make sure they are completely dry. Our materials meet the highest standards of quality for outdoor usage. All fabrics are quick-drying and easy to maintain.

DRY+ CUSHION CONSTRUCTION

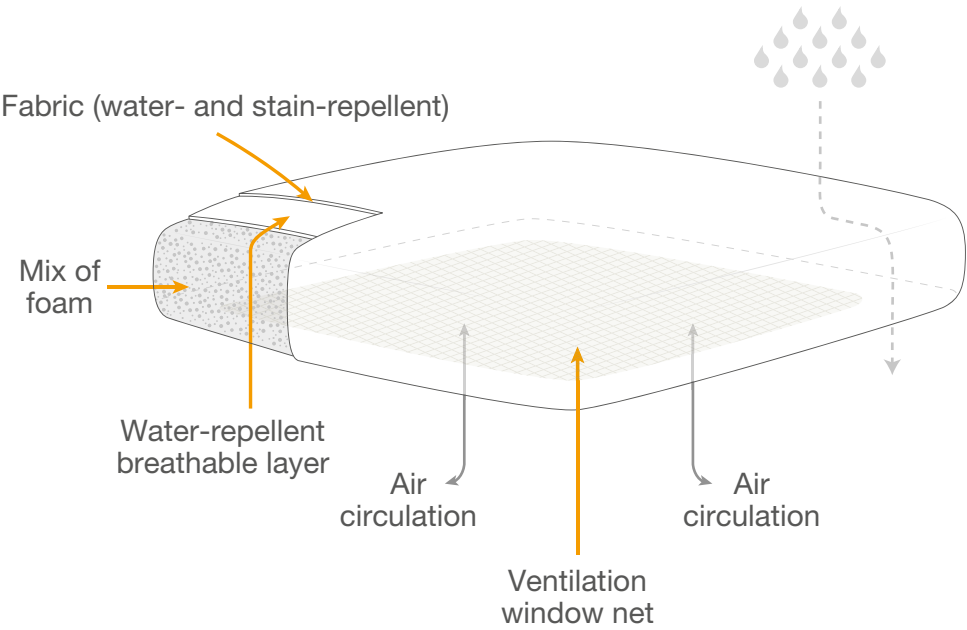

Dry+ cushions offer enhanced rain protection. Cushion cores are wrapped in a breathable polyester interlayer with a very high water-repellent rating of 10,000 mm. All cushion cover fabrics are specially treated to be stain- and water-repellent. Available for any collections accompanied by this icon:

TEN FABRIC STYLES TO PLAY WITH

Each of the ten fabric styles in this catalog has a distinctive weaving structure that gives it a look and feel all its own. While any one of these fabrics is an ideal covering for cushions large or small, it's the opportunity to combine them that makes the DEDON collection so special. Play with textures. Mix the summerly lightness of COOL with the tweedy robustness of GLAN. Create subtle differences of shade by working with multiple fabric structures in the same color. The flexibility and creativity long associated with the finest indoor fabrics can now be enjoyed under the open skies.

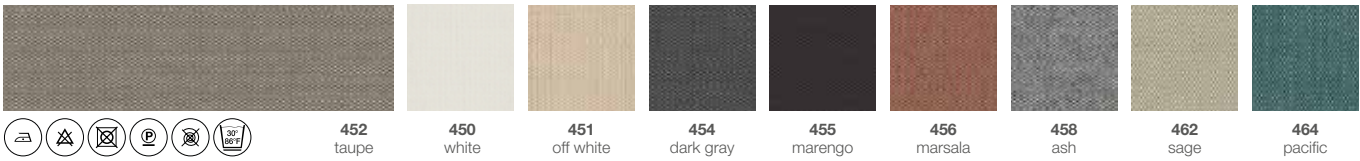

DRY+ CUSHION CONSTRUCTION

FABRICS

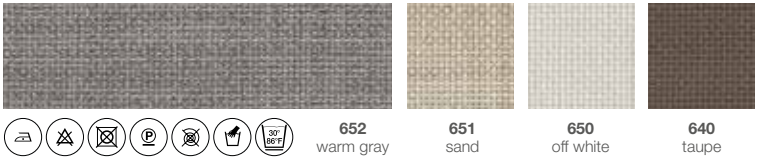

CATEGORY A — For all collections

COOL Acrylic — A Light, soft, summery fabric in a strié weave, COOL has a cotton-like touch and carries color beautifully.

CATEGORY B — For all collections

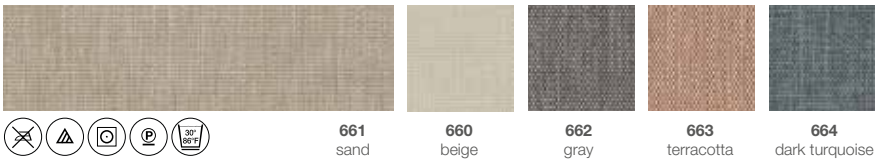

LINEN Acrylic — LINEN is an exceptionally comfortable fabric with a natural look and feel and a contemporary color palette.

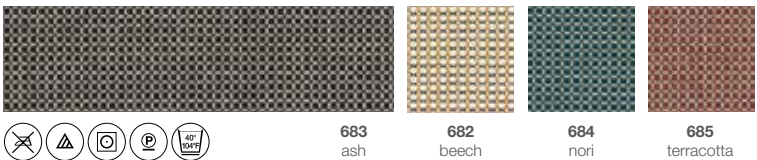

TWELLO Acrylic — A heavy-weight and robust fabric, TWELLO is woven with twisted yarns for a crisp, fresh and inviting touch.

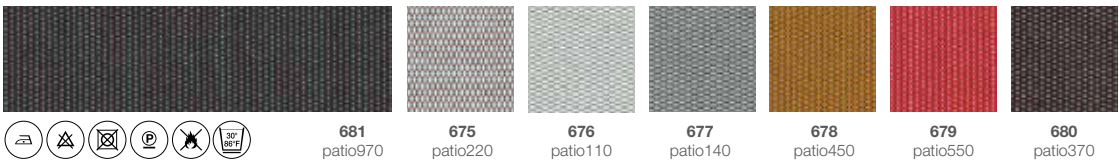

TWIST Polypropylene — Woven from fine twisted yarn, TWIST is a fresh, cool fabric with depth, structure and a lively color effect.

MAR Polypropylene — Made of a blend of colored yarns in a basket weave, MAR is available in four colors, each one rich and complex.

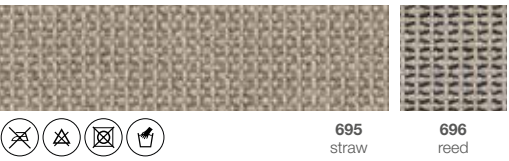

PATIO by KVADRAT Trevlra CS — With its subtle woven structure, PATIO by Kvadrat stands out for its softness and exceptional color vibrancy.

CATEGORY C — Fabrics are exclusive to specific collections

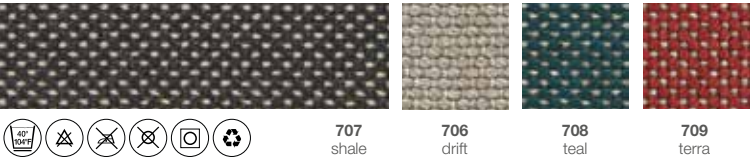

PUNO Acrylic — This thick and pleasing fabric gets its natural appearance through the use of 50-percent recycled post-industrial fibers, which convey both depth and richness of tone.

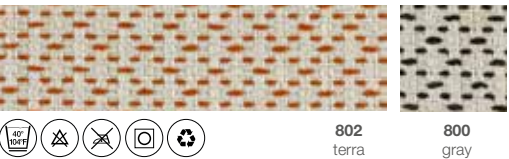

DUNE Acrylic — Soft and inviting, this fabric's chunky yarns are spun with 50-percent recycled post-industrial fibers in a mix of colors, ensuring each yarn is unique.

GLAN Polypropylene — A thick and hearty fabric, available in four colors, GLAN is distinguished by its inviting 3D woven structure.

DOTS Polypropylene — Available for deco cushions only, DOTS brings vibrant accents to any setting with its graphic, structured pattern.

WARRANTY

TERMS

DEDON warrants to the original purchaser that our product is free from defective materials and workmanship under its intended reasonable use. The warranty starts from the date of sale to the end consumer. The warranty is non-transferrable, and is applicable to the original purchaser only. Proof of purchase will be required.

Any product believed to be of faulty materials or workmanship should be reported to DEDON as soon as reasonably possible.

Following DEDON's assessment, any fault found and covered by this warranty will be rectified by the replacement or repair of the faulty part or product. DEDON will determine whether to replace or repair a faulty part or product. If deemed necessary to return a product for repair, DEDON will arrange for it to be returned to us via our choice of transit, and sent back to the original purchaser, free of charge. Circumstances may dictate the local repair is best course of action. No returns are accepted without prior written authorization from DEDON. The product must not have been misused or handled carelessly, nor have been damaged, neglected or used in abnormal conditions. The product must not have been modified, altered in any way, or repaired by anyone other than a member of DEDON staff or their appointed representatives.

The warranty will be valid only if proper maintenance and cleaning have been carried out in accordance with DEDON's aftercare instructions. This warranty does not apply to normal wear and tear caused by regular use or the passage of time. Damage such as dents, scratches or small chips in the paintwork arising from use are not covered by this warranty. Marks and/or tears to fabrics or fibers that have happened during normal use are not covered by this warranty. Small cracks, which may appear in the end grain of teak when exposed to the elements, and any change of appearance due to usual weathering and/or changes in wood texture are considered natural for teak outdoor furniture and are not covered by this warranty. Wheels and foot caps are excluded from the general warranty, but are guaranteed for a period of one year from the date of delivery. The Sling/Strap/Rope warranty covers against tearing, discoloration, fading or change in shade of colors. Normal sagging is to be expected as a result of use and is not covered by this warranty. Due to the nature of the planks used to create RAW table tops, any splits, cracks in the end grain, hollow knots, twisting of timber over time, or degradation of the sapwood when outdoors are considered natural for thick-plank, teak outdoor furniture and are not covered by this warranty.

Reporting of complaints

In order to look in to complaints/warranty issues, DEDON requires ALL of the following information provided in one single email: Photographs of the issue—general overview and close-ups of specific areas of damage and/or failure. Product code of item affected. The batch number and country of origin, which can be found on a small rectangular label located out of sight, usually on the underside of the item (for cushions, on the inside of the zipper; for covers, on the label). Date of purchase: Please send a copy of the invoice as proof of the purchase date. Location of furniture, e.g. coastal/inland/swimming pool. Brief description of the damage and how the damage occurred.

Please always use a reference, i.e. a customer number in the title of the email, so that it is easy to track. Potential claims can be processed only if DEDON receives ALL necessary data. Once all of the above information has been received, we will review the case and advise in due course.

Returns policy

Written authorization must be obtained from DEDON prior to returning any physical products. Products returned without prior written authorization will be refused. DEDON accepts the return of a product only in cases of a manufacturer's defect. Products that were authorized to be sent to DEDON but show damage that is obviously due to improper use or storage of the product, damage resulting from normal wear and tear in the course or normal use of the product, or other damages that are not due to a manufacturer's defects will be returned to the sender at the sender's expense. DEDON reserves the right, in the event of rejection of a complaint, to pass on to the sender any freight costs incurred by DEDON as well as fees for processing and inspection of products that are subject to an unjustified complaint. Returned products are inspected by our Quality Control Department and replaced or repaired if the damage is a result of a manufacturer's defect. If it is determined not to be a manufacturer's defect, the customer, along with the Quality Control Department, will decide what further action to take.

BEST REASONS FOR CHOOSING DEDON

Produced in our own facilities

The manufacturing of both DEDON Fiber in Germany and DEDON furniture in the Philippines take place in our own production facilities. This is unique in the outdoor furniture industry and ensures that fine craftsmanship is combined with innovative technology. DEDON's master weavers in the Philippines use ultra-strong fibers from our own DEDON production. For our contract partners, in-house production also means special opportunities for customization.

World's best fiber

No matter if it's desert wind, salt water or frost, DEDON Fiber is tested against all weather conditions and for 10 years' UV resistance. Produced in Germany by our team of specialists, it is unrivaled for strength, color fastness and longevity. And because DEDON Fiber is developed entirely in-house, we are able to work with designers to create innovative solutions, including unique colors, textures and profiles.

The right material for every setting

Specialists in outdoor living spaces of all kinds, DEDON selects the right material for every setting, from covered terraces to exposed poolsides to sandy beaches to wild nature. That's why, in addition to the world's best fiber, we work with highest-quality teak, aluminum, woven textiles, ceramics and upholstery, all manufactured with passion for excellence.

Sustainability

It is DEDON's corporate philosophy to create furniture and accessories of such high quality that they need never be thrown away. Produced in our environmentally-sound facilities in Northern Germany, DEDON Fiber is 100% recyclable and free from pollutants and heavy metals. In addition DEDON incorporates recycled materials into our products whenever feasible.

Design

DEDON collaborates with the world's top designers, from famous names to rising stars, on collections that consistently win the most prestigious design awards. Our in-house research and development department is able to work closely with each designer on solutions and innovations that make all the difference in terms of quality, function and style.

Global reach

Distributed in more than 80 countries, with showrooms and sales office around the world, DEDON is a global company with a global mindset. We travel the world — with furniture and our team — as part of our ongoing Tour du Monde adventure, and no island or secret hideaway is too remote for us. Wherever our contract partners have projects to undertake, DEDON is available and ready to help.
